Re: Structured Cabling Solutions

To whom it my concern,

Siemens recently successfully partnered with Structured Cabling Solutions "SCS" at the new American Express Corporate headquarters located in Sunrise Florida. SCS was in charge of the installation of SEVERAL key aspects of the building and was an Integral part of getting the American Express building opened for business and up and running. The American Express Building is one of Siemens Flagship projects with multiple discipline successful execution.

The Systems SCS were in charge of installing were as follows:

- IT INFRASTRUCTURE
- Card access system
- CCTV system
- Intercom system
- Area of Refuge system

SCS was the Most Dependable Subcontractor that Siemens had onsite. Whenever something needed to get done, SCS attacked the challenge put forth and made it happen expeditiously.

If you have any questions or issues please feel free to call me.

With kind regards,

Siemens Building Technologies, Inc.
Miami Branch
